

COVID testing

New PCR (not rapid antigen test) UMB app and self-swab procedure from Campus Health. The steps are subject to change as needed:

This is not the new antigen rapid testing. That will be available at a later date using different test kits/processes.

1. User gets an email from campus health (see below). Pilot users will be chosen by Campus Health.
 - a. Sample email:

Good Afternoon,

You are scheduled for an SU COVID-19 test on 1/13/2021. You recently received an email from the University of Maryland Pathology Associates/MG Scanner. This is a legitimate email and you should download the application prior to showing up for your test tomorrow.

Instructions are attached for the new test which takes less time.

If you are unable to sign up for the application, we will still be able to test you using the tests that we used last semester.

Campus Health

Salisbury University

2. User will also get a separate email from UMB (see below) to download an app called "marylandgenomics" or MGScanner
 - a. If users can't find the app on Google Play store, try searching "marylandgenomics"

MARYLAND GENOMICS

Dear Name,

Welcome to the University of Maryland Pathology Associates / Maryland Genomics SARS-CoV-2 Testing Program. We are working with your institution to help with on-site testing.

You will be using the MarylandGenomics SampleScanner mobile app to scan specimen tubes and send us the information about the samples. Please install the app from your device's app store. Once you have installed the app, please register the app by using the instructions below.

If you have any questions or concerns, please talk with your campus health center or administration.

Please follow these steps.

Download the app from the app store or the google play store

Come back to the email and register here

Register (link removed
for security)

If you are having trouble registering your device using the register button, you can alternatively launch the app and scan the QR code below.

QR Code (removed for security)

3. Download and register the app and your email address in advance of testing.
4. Once registered at the time of your appointment, they will scan a test kit and your phone/QR code from the app to associate the test to your user id (generated by the app)
5. Follow the self-swab instructions below
 - [Instructions for Self Collection.pdf](#)
 - a. Key difference is swab gets discarded.
