# Connect to the SU-Secure Wireless Network using Windows 10

This document will give you instructions on how to connect your Windows 10 Computer to our SU-Secure wireless network.

Your browser does not support the HTML5 video element

## Automated System Instructions (Preferred)

1. Click the **Network** Icon in the bottom right-hand corner, near the date and time, and select **SU-Connect** and click **Connect**.
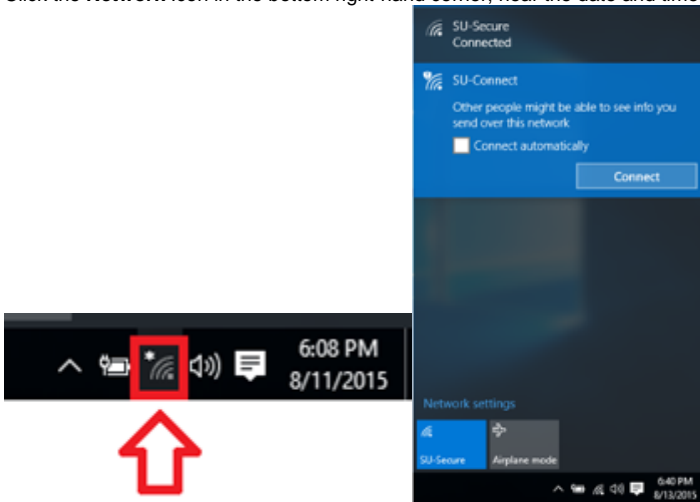

2. Open a web browser, such as **Internet Explorer**, and navigate to http://connect.salisbury.edu.
3. Click **Personally Owned Device** or **Salisbury University Owned Devices**.
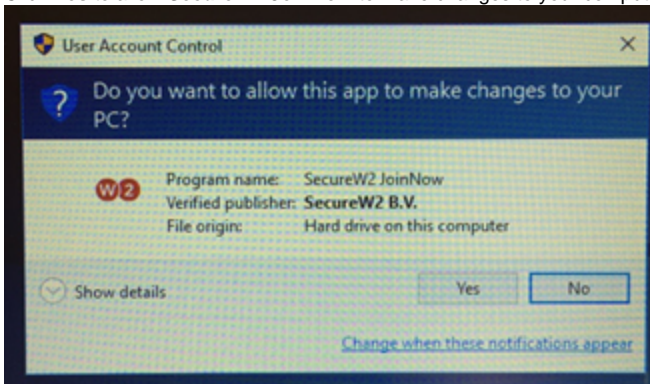

4. Click the **JoinNow** button.

5. Click **Run** to run **WiFi_Salisbury_University_Wrapper.exe**.

**6.** Click **Yes** to allow **SecureW2 JoinNow** to make changes to your computer.

7. Now enter your Salisbury Username and Password and click **Next.**

8. If your password is up-to-date and your account is active, this process will complete and you will need to click **Done**.

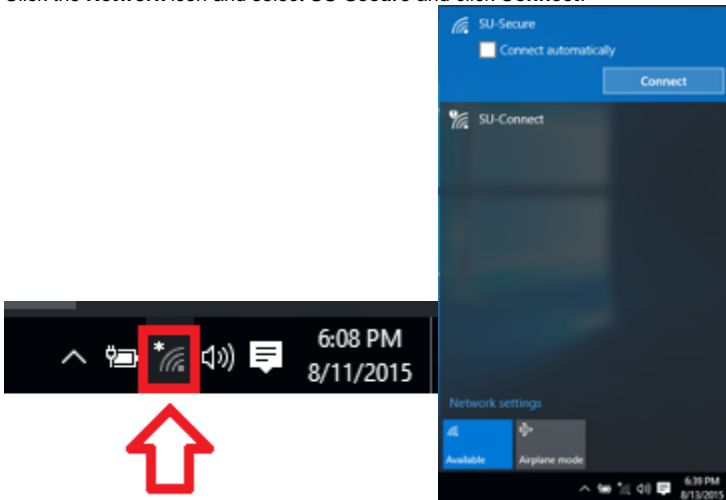

9. You can see that you are now connected to **SU-Secure** by clicking the **Network** icon.

Direct Connection

If the automated process does not work on your computer, here are the instructions on how to connect directly to SU-Secure.
1. Click the **Network** icon and select **SU-Secure** and click **Connect**.

2. Enter your Salisbury University Username and Password and click **OK**.

3. You can see that you are now connected to **SU-Secure** by clicking the **Network** icon.

Manually Connect

If connecting directly to SU-Secure does not work on your computer, here are the instructions on how to manually connect to SU-Secure.
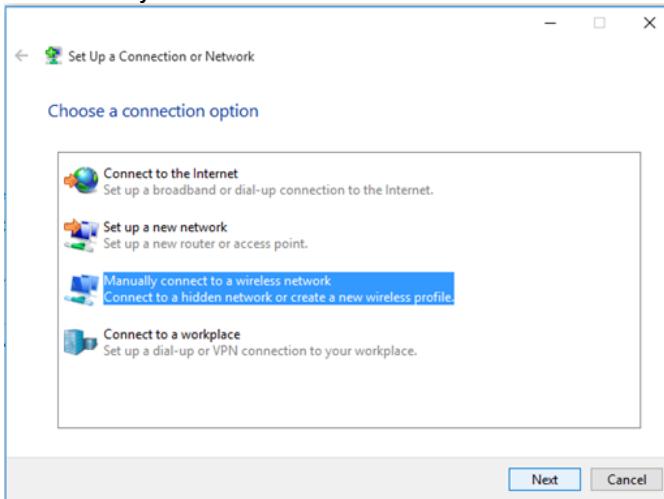

1. Click the search box in the bottom left-hand corner, search for and select **Control Panel**.
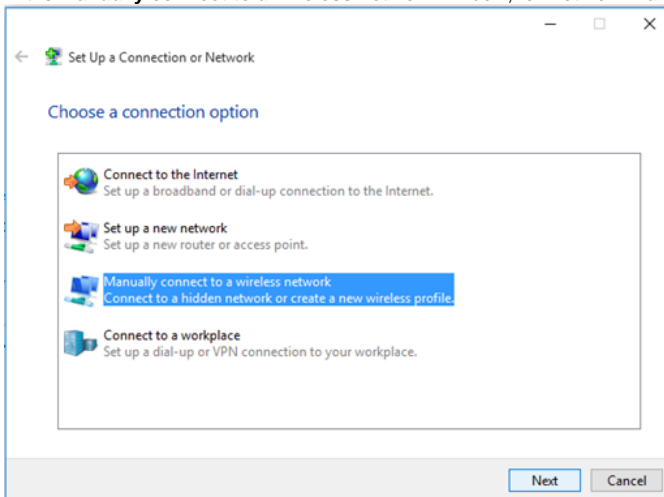

2. In **Control Panel**, type **wireless** in the search box in the top right corner. The window below will display matches to the search.
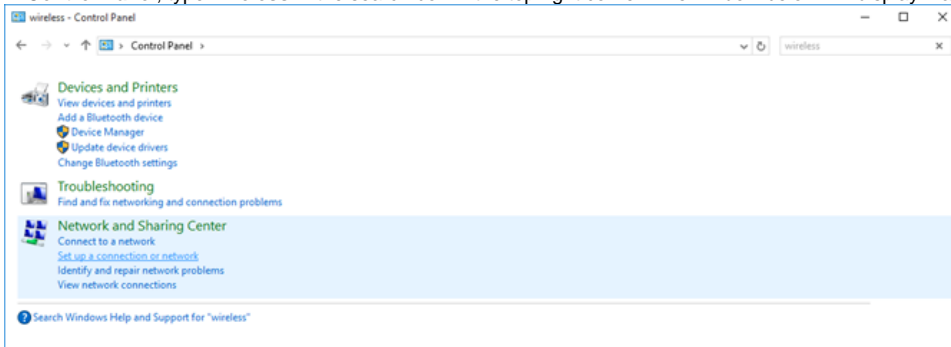

3. Select **Set up a connection or network** under **Network and Sharing Center**.
4. Select **Manually connect to a wireless network** and click **Next**.

5. In the **Manually connect to a wireless network** window, for **Network Name** enter **SU-Secure**.

    a. For **Security type**, select **WPA2-Enterprise** from the drop-down.
    b. For **Encryption Type**, make sure **AES** is selected from the drop-down.
    c. Make sure that both **Start this connection automatically** and **Connect even if the network is not broadcasting** are checked.
    d. Then click **Next**.

6. The window will change to indicate you have **Successfully added SU-Secure**.

7. Click **Change connection settings**.
8. In the **SU-Secure Wireless Network Properties** window, click the **Security** tab.
      a. In **Choose a network authentication method**, **Microsoft: Protected EAP (PEAP)** should be selected.
      b. Click the **Settings** button.
      c. In the **Protected EAP Properties** window, make sure that **Validate server certificate** is checked.
      d. Check **Connect to these servers:** and type **.*.salisbury.edu** (**period + asterisk + period + salisbury + period + edu**) in the box provided.
      e. In **Trusted Root Certification Authorities**, check **thawte Primary Root CA**.
      f. In **Select Authentication Method**, verify that **Secured password (EAP-MSCHAP v2)** is selected and click **Configure**
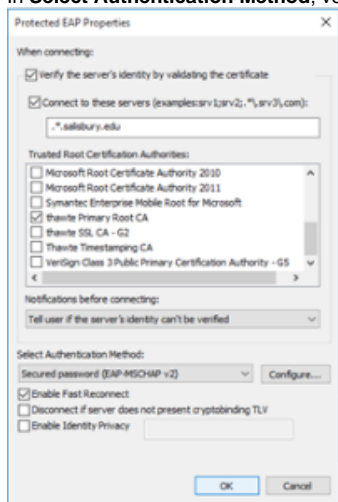

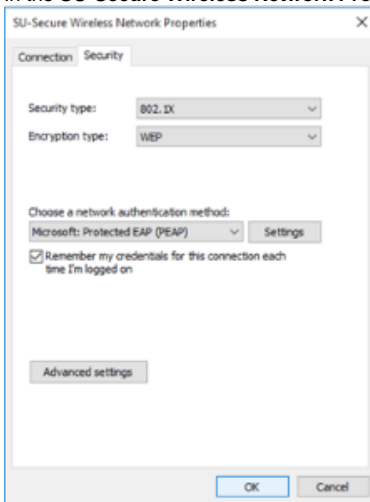

i. In the EAP MSCHAPv2 Properties window, uncheck **Automatically use my Windows logon name and password (and domain if any)**.

ii. Click **OK**.

g. Click **OK** to exit the **Protected EAP Properties** window.

9. In the **SU-Secure Wireless Network Properties** window, under the **Security** tab, click the **Advanced settings** button.

a. Click the **802.1x settings** tab.

i. Make sure that **Specify authentication mode** is checked, and select **User authentication** from the drop-down menu.
b. Click **OK** to close the **Advanced settings** window.

10. Click **OK** to exit the **SU-Secure Wireless Network Properties** window.
11. Click **Close** on the **Manually Connect to a Wireless Network** window.
12. Exit out of the **Control Panel** window as well.

13. Click the **Network** icon and select **SU-Secure** and click **Connect**.

14. Enter your Salisbury University Username and Password in the click **OK** and then **Connect**.

15. You can see that you are now connected to **SU-Secure** by clicking the **Network** icon.
