# Connect to the SU-Secure Wireless Network using an iPhone or iPad

This document contains instructions on how to connect your Apple iPhone/iPad to our SU-Secure wireless network.

Your browser does not support the HTML5 video element

Automated System instructions(Preferred Method)
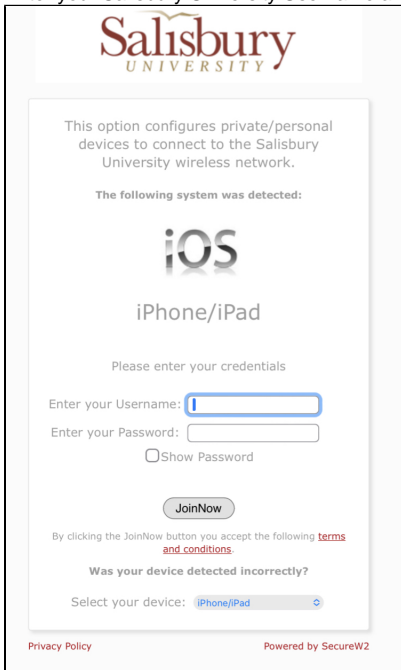

1. Open **Settings**.
2. Click **Wi-Fi**.

3. Select **SU-Connect**.

4. Open a web browser, such as **Safari**, and navigate to http://connect.salisbury.edu.
5. Choose **Personally Owned Device** or **Salisbury University Owned Devices**.

**6.** Enter your Salisbury University Username and password then click **JoinNow**.

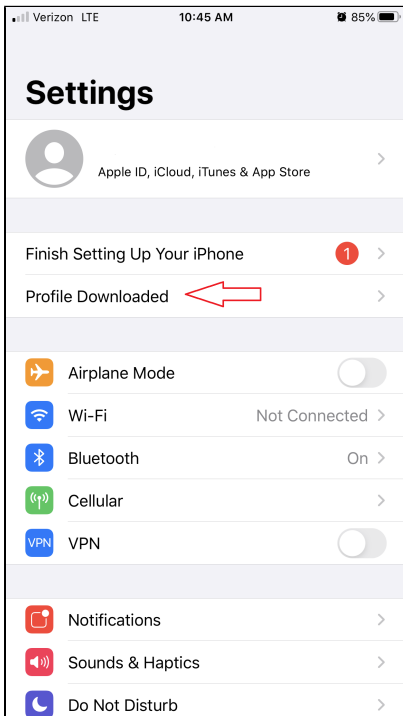

7. Choose to **Allow** the website to download the configuration file.
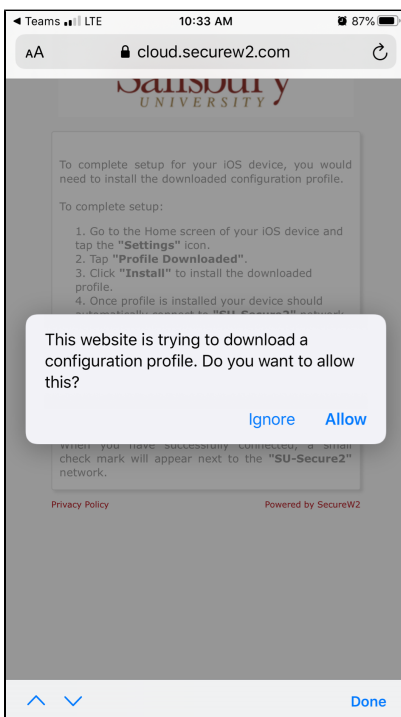

8. The following screen will appear after allowing the download of the profile. Click **Close** and navigate to **Settings** on your iPhone.

9. Under **Settings** on your iPhone, there will be a **Profile Downloaded** item near the top of your settings. Open the **Profile Downloaded.**
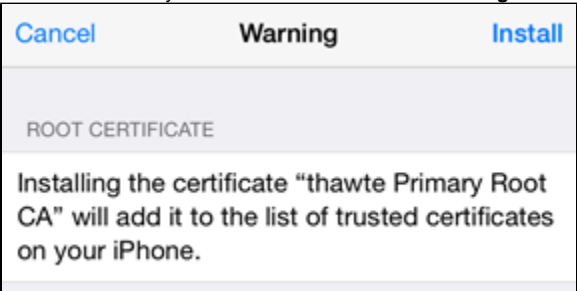

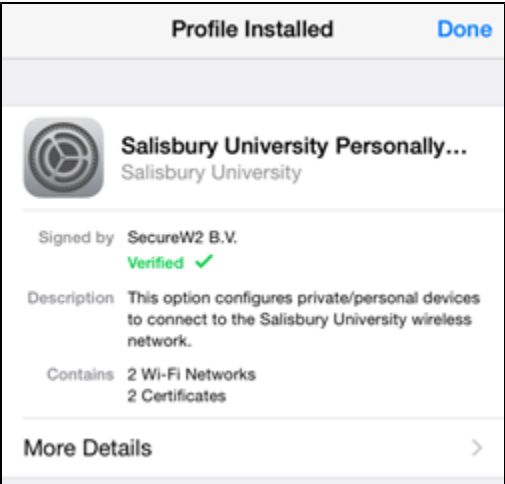

10. Click **Install**, to install the **Profile.**

**11.** Enter your device **Passcode**.

12. Click **Install** when you see the **Root Certificate Warning**.

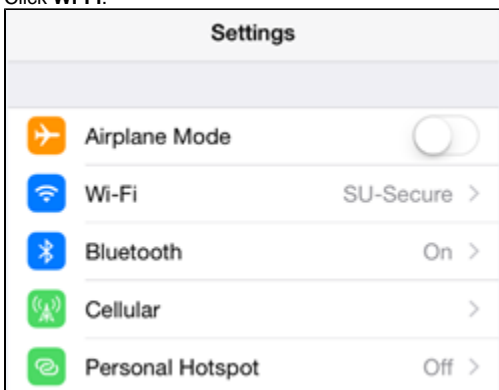

13. The **Profile** is now installed. Click **Done**.

**14.** You should now be connected to **SU-Secure**.

Direct connection instructions

**1.** Open **Settings.**
**2.** Click **Wi-Fi**.

3. Select **SU-Secure**.

4. Enter your Salisbury University Username and Password and click **Join**.

5. Click **Accept** to accept the certificate.

6. You should now be connected to **SU-Secure**.

If your device has problems connecting to the network please be sure the randomized or private MAC address option is disabled see instructions here: Private (MAC) Address Setting Issue - iOS and Android
