Requesting a change to the SU website

Problem

I need help changing or creating a page on the SU website (http://www.salisbury.edu). Who handles those requests?

Solution

The Web Development Office can assist with most of your website creation/editing requests through their online Website Work Request form. You can find out more information at their webpage: https://www.salisbury.edu/administration/advancement-and-external-affairs/marketing-and-public-relations/web-development/index.aspx.
