

Folios in MyClasses

Portfolio is a free, online academic portfolio network allowing users to showcase education and work accomplishments and connect with other professionals. A Portfolio profile allows users to organize and display previous educational and professional content directly from within MyClasses. You can upload images, Videos (YouTube, Vimeo), PDFs, text documents, and more to your portfolio. Folio is the integrated shortcut that links MyClasses Canvas to Portfolio.

Please Note

You can click on the images below to see them larger and with more detail.

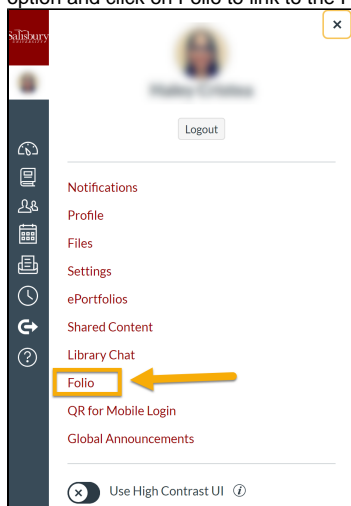

Step-by-step guide

To start building your ePortfolio in Portfolio:

1. Log into MyClasses and click on your Account setting icon.

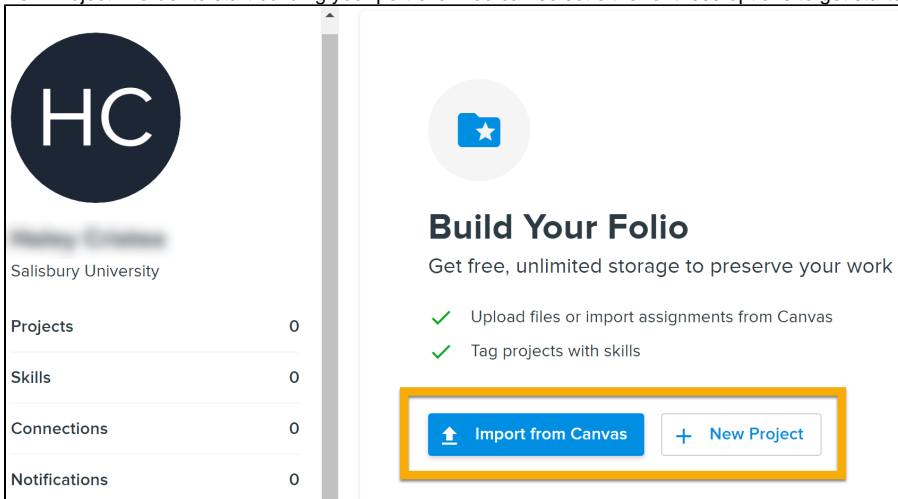

- a. Click on Folio from the Account option menu. You may notice that there is also currently an "ePortfolios" option on this menu; skip this option and click on Folio to link to the Portfolio Network.

What's the difference between "ePortfolios" and "Folio?"

ePortfolios is the original, native Canvas portfolio tool, but it is not a robust feature in MyClasses. Instead of building out this feature, Canvas acquired Portfolio to eventually replace the current ePortfolio option. In time, after a migration period towards Folio, Folio will remain as the sole ePortfolio option.

2. The first time you access Folio, you will be taken to a Folio landing page that prompts you to either import from Canvas (MyClasses) or add a New Project in order to start building your portfolio. You can select either of these options to get started.

3. Authorize Portfolium and MyClasses to link using your SU email address.

- Set a password; if you go directly to [Portfolium.com](https://portfolium.com) to work on your ePortfolio, you can log in with your SU email and the password you set here.
- Add your birthdate.
- Read and agree to the Portfolium terms of service and privacy policy.
- Continue to your Portfolium account, using your SU email.

Email options

Linking your SU MyClasses account and your Portfolium account using your SU email allows you to import assignment submissions from MyClasses directly into your ePortfolio. However, you can [add an additional email address](#) to your account for continued access to this portfolio even after you graduate. This portfolio can be used to apply to jobs after graduation, and can continue as a professional portfolio in your career.

4. Once you verify your email and link MyClasses to Portfolium, a new tab will open in Portfolium.com where you can start building out your SU ePortfolio. Review these additional [Getting Started with Portfolium](#) guides for building out your ePortfolio.

The screenshot shows the Portfolium 'Draft' page. At the top, there's a header with the Portfolium logo, a 'Draft' status, a settings gear icon, and buttons for 'PREVIEW', 'FINISH LATER', and 'PUBLISH'. The main content area is divided into two columns. The left column has an 'Attachments' section with three options: 'Upload files' (with a file icon and supported formats: .pdf, .doc, .xls, .ppt, .mp3, .psd, etc.), 'Paste a link' (with a link icon and supported sources: YouTube, Prezi, or any website), and 'More options' (with a three-dot icon and supported services: Google Drive, Dropbox, etc.). Below this is a 'Category' section with a text input field labeled 'Start typing a category...'. At the bottom of the left column is a 'Description' section with a large text area labeled 'Describe your project...'. The right column features a 'Project Strength' section with a progress bar. Below that is an 'Attachments' section with a description: 'Showcase artifacts and work samples from your project. Upload files, import them from services like Google Drive, or add a link to any website.' It also includes 'Link examples:' with a bulleted list: 'youtube.com/watch?v=id', 'github.com/myrepo', 'sketchfab.com/models/id', and 'medium.com/article'. A link 'Learn more about attachments' is provided. At the bottom right of the right column is a 'Chat with an Expert' button.
